1. Pre-Launch Strategy (Weeks 1-2)

1.1 Brand Positioning and Messaging

Predictly occupies a unique position at the intersection of prediction markets and sweepstakes gaming. The brand must communicate three core pillars: **accessibility** (anyone can play, no crypto needed), **legality** (sweepstakes model works in 48+ US states), and **intelligence** (AI-powered agents provide real-time insights). The dual-currency system (Gold Coins for practice, Sweeps Coins for real rewards) is the key differentiator from competitors like Kalshi or Polymarket.

Brand Promise: "Predict the future. Win for real."

Core Messaging Framework

Audience	Primary Message	Emotional Hook
Crypto/Finance	Trade outcomes, not just stocks. Zero fees on GC trades.	Smart money plays here.
Politics	Put your prediction where your mouth is. Real rewards for being right.	Your political IQ has cash value.
Sports Fans	Predict games beyond the scoreboard. Every play, every call.	You called it. Now cash in.
Tech Enthusiasts	Bet on innovation timelines. AI, space, startups.	The future is predictable. Profit from it.
General (18-34)	Free to play. Real to win. The smartest game on the internet.	Finally, being right pays off.

1.2 Social Media Account Setup

Set up all accounts within the first 3 days. Consistency across platforms is critical for brand recognition.

Platform	Handle	Bio Line	Priority	Setup Date
Twitter/X	@PredictlyAPP	Predict the future. Win for real. Dual-currency prediction market. #Predictly	HIGH	May 25
Reddit	u/PredictlyOfficial	Official Predictly account - prediction markets for everyone	HIGH	May 25
Discord	discord.gg/predictly	Predictly Community - Markets, Trading, Rewards	HIGH	May 26

TikTok	@PredictlyApp	Predict the future, win for real	MEDIUM	May 27
Instagram	@PredictlyApp	Prediction markets made simple	LOW	May 28
YouTube	Predictly	Prediction market tutorials & market analysis	LOW	May 29

Profile image: Use the Predictly logo on all platforms. Cover images should feature the tagline "Predict the future. Win for real." with a market chart visual.

1.3 Content Calendar (Weeks 1-2)

Post cadence: Twitter 2x/day, Reddit 1x/day, TikTok 3x/week, Discord daily engagement. Below is the detailed day-by-day calendar.

Day	Twitter/X Post 1	Twitter/X Post 2	Reddit Post	TikTok
Mon W1	Teaser: "Something big is coming to prediction markets..." #Predictly	Thread: Why dual-currency prediction markets are the future	r/PredictionMarkets: "What if prediction markets were free to play?"	
Tue W1	"Gold Coins or Sweeps Coins? Why not both?" Explainer graphic	Poll: "Which market category excites you most? Politics/Crypto/Sports/Tech"	r/CryptoCurrency: "Prediction markets without crypto - possible?"	15s: GC vs SC visual explainer
Wed W1	Sneak peek: Market card design reveal #BuildInPublic	Thread: The legal landscape of prediction markets in the US	r/legaladvice: "Sweepstakes prediction markets - legal analysis"	
Thu W1	"12 markets. 8 categories. 1 platform." Market categories reveal	Quote RT: Industry news about prediction markets + Predictly angle	r/sportsbook: "What if you could predict more than just scores?"	30s: Market categories countdown
Fri W1	Founder story: "Why I built Predictly as a solo founder" thread	Community question: "What market would you trade first?"	r/Entrepreneur: "Building a prediction market solo - my story"	
Mon W2	"Meet Scout - your AI market analyst" Agent reveal #1	Thread: How AI agents give Predictly users an edge	r/artificial: "AI agents that analyze prediction markets"	15s: Scout agent introduction

Tue W2	"Meet Oddsmaker - the AI that sets the lines" Agent reveal #2	Infographic: The 6 AI agents of Predictly	r/DataScience: "AI-powered odds making for prediction markets"	
We d W2	Launch countdown: "7 days until Predictly" with daily teasers	Behind-the-scenes: Building the platform in 30 days	r/SideProject: "30-day build challenge: prediction market platform"	30s: Build -in-public time lapse
Thu W2	"Meet Sentry - the AI that guards your portfolio" Agent reveal #3	User testimonial mockup: "I called the election AND won SC"	r/investing: "Prediction markets as an alternative investment thesis"	
Fri W2	"3 days until launch." Urgency post with early access link	AMA announcement: "Ask me anything about Predictly - Monday 7pm ET"	r/AMA: "I built a legal prediction market platform - AMA Monday"	15s: Launch co untdown teaser

1.4 Email List Building Strategy

Target: 500 email subscribers before launch day. The email list is the highest-converting channel for a bootstrap launch.

- **Launch landing page** (Day 1): "Get early access + 1,000 free Gold Coins" incentive. Use a simple single-field email capture.
- **Twitter bio link**: Direct to landing page. Update immediately after account creation.
- **Reddit "early access" posts**: Offer exclusive early access to r/PredictionMarkets members who sign up.
- **Discord pre-launch channel**: Create #early-access channel. Email gate for full access.
- **Referral waitlist**: "Skip the line by referring 3 friends" - positions 1-100 get bonus GC.
- **ProductHunt "Coming Soon"**: List on PH 2 weeks before launch to capture email interest.
- **Cold outreach**: DM 50 niche influencers with personalized "sneak peek" offer.

1.5 Influencer Outreach Plan

Target: 10 micro-influencers (1K-50K followers) in prediction markets, crypto, sports betting, and politics niches. Budget: \$0 (equity/revenue-share or free access deals).

Influencer Type	Platform	Offer	Expected ROI	Outreach Date
Crypto analysts	Twitter/X	Free SC + early access + affiliate link	500-2,000 signups	May 26

Sports bettors	YouTube/Twitter	Free SC + sponsored content deal	300-1,000 signups	May 27
Political commentators	Twitter/Substack	Exclusive market data access	200-800 signups	May 28
Finance YouTubers	YouTube	Revenue share on referrals	500-1,500 signups	May 29
TikTok creators	TikTok	Free GC/SC + affiliate program	1,000-5,000 views	May 30

1.6 SEO Foundation

Target Keywords (Month 1)

Keyword	Search Volume	Difficulty	Content Type	Publish Date
prediction market	12,100/mo	High	Blog: "What Is a Prediction Market?"	May 26
free prediction market	2,900/mo	Medium	Landing page optimization	May 27
prediction market app	1,900/mo	Medium	Blog: "Best Prediction Market Apps 2026"	May 28
sweepstakes prediction market	480/mo	Low	Blog: "Legal Prediction Markets: The Sweepstakes Model"	May 29
predict politics for money	720/mo	Low	Blog: "How to Predict Political Outcomes for Rewards"	May 30
AI prediction market	390/mo	Low	Blog: "AI-Powered Prediction Markets: The Future"	Jun 1
dual currency prediction market	110/mo	Very Low	Product page / FAQ	May 27
gold coins sweeps coins	260/mo	Low	Blog: "Gold Coins vs Sweeps Coins Explained"	May 28

Meta Tags Template

Title: Predictly - Free Prediction Markets | Predict the Future, Win for Real

Description: Trade predictions on politics, crypto, sports, and tech with Predictly. Practice with Gold Coins, win real rewards with Sweeps Coins. Free to play, legal in most US states.

OG Image: Market card with "Predict the future. Win for real." tagline

2. Launch Campaign (Weeks 3-4)

2.1 Launch Day Checklist

Target launch date: **June 7, 2026 (Sunday)** - Sunday launches capture weekend browsing traffic and allow Monday press pickup.

Time (ET)	Task	Owner	Status
6:00 AM	Final production deploy + smoke test all 12 markets	Founder	[]
7:00 AM	Post launch tweet thread (25-part detailed thread)	Founder	[]
7:15 AM	Email blast to full subscriber list	Founder	[]

2.2 Social Media Blast Scripts

Twitter/X Launch Thread (First 5 of 25 tweets)

Tweet 1/25: *PREDICTLY IS LIVE.* The free prediction market where you can win real rewards. 12 markets. 8 categories. 0 fees on practice trades. This is the future of forecasting. Let me tell you how we got here.

Tweet 2/25: *Most prediction markets require crypto. Not Predictly.* Our dual-currency system lets you practice with Gold Coins (free, unlimited) and compete with Sweeps Coins (redeemable for cash prizes). No wallet needed.

Tweet 3/25: *12 markets at launch:* Presidential Election, Bitcoin \$150K, Super Bowl Winner, AGI by 2028, Fed Rate Cut, Oscar Best Picture, Mars Mission 2030, and 5 more. Every category, every interest.

Tweet 4/25: *6 AI agents power Predictly:* Scout (market analyst), Oddsmaker (odds engine), Sentry (risk guard), Oracle (resolution engine), Chronicler (historian), Prophet (predictor). They work 24/7 so you trade smarter.

Tweet 5/25: *Legal in 48+ US states.* Our sweepstakes model means no crypto gambling regulations. Play from your phone. Win from your couch. Predictly is prediction markets for everyone.

Reddit Launch Post (r/PredictionMarkets)

Title: "After 30 days of solo building, I launched a free prediction market platform - Predictly"

Body: "Hey r/PredictionMarkets - I just launched Predictly, a dual-currency prediction market that is free to play and legal in most US states. No crypto needed. We have 12 markets covering politics, crypto, sports, tech, economics, pop culture, science, and world events. Gold Coins are free and unlimited for practice. Sweeps Coins can be redeemed for real rewards. 6 AI agents (Scout, Oddsmaker, Sentry, Oracle, Chronicler, Prophet) provide real-time market intelligence. Would love your feedback and first trades!"

TikTok Launch Script

Hook (0-3s): "What if you could predict the future and get paid for being right?"

Body (3-12s): "This is Predictly. 12 markets. Politics, crypto, sports, tech. Practice for free with Gold Coins. Win real rewards with Sweeps Coins. No crypto wallet needed. Legal in most states."

CTA (12-15s): "Link in bio. Your first 1,000 Gold Coins are free."

2.3 Email Campaign Templates

Welcome Email

Subject: Welcome to Predictly - Your 1,000 Gold Coins Are Waiting

Body: "Hey [Name], welcome to Predictly! You just joined the smartest community of predictors on the internet. Here is what happens next: (1) Your 1,000 free Gold Coins are already in your account. Start trading on 12 live markets now. (2) Check out our AI agents - Scout analyzes markets, Oddsmaker sets the lines, and Prophet makes predictions. (3) Want real rewards? Switch to Sweeps Coins anytime. Redeemable for cash prizes. Your first market is waiting. Go predict."

First Trade Encouragement (Day 2)

Subject: You haven't made your first prediction yet...

Body: "Hey [Name], your 1,000 Gold Coins are sitting idle and that is a waste of good predictions. Here are 3 markets trending right now: [Market 1], [Market 2], [Market 3]. The top predictor this week won 50,000 GC. Could be you next week. Make your first trade now - it takes 10 seconds."

Onboarding Sequence

Email	Day	Subject	Goal
Welcome	0	Your 1,000 Gold Coins Are Waiting	Activate account
First Trade	2	You haven't made your first prediction yet...	First trade
Market Highlights	4	These 3 markets are heating up	Engagement
SC Introduction	7	Ready to play for real? Meet Sweeps Coins	SC conversion
Weekly Digest	14+	Your Weekly Predictly Digest	Retention

2.4 Press Release Draft

FOR IMMEDIATE RELEASE

Predictly Launches Free Prediction Market Platform with Dual-Currency System and AI-Powered Market Intelligence

June 7, 2026 - Predictly, the first dual-currency prediction market platform, today announced its public launch. Predictly combines free-to-play Gold Coins with redeemable Sweeps Coins, making prediction markets accessible to everyone in the US without requiring cryptocurrency wallets or accounts.

The platform launches with 12 markets spanning politics, cryptocurrency, sports, technology, economics, pop culture, science, and world events. Six AI agents - Scout, Oddsmaker, Sentry, Oracle, Chronicler, and Prophet - provide real-time market intelligence, automated odds-making, and portfolio risk management.

"Prediction markets should be for everyone, not just crypto enthusiasts," said the founder. "Predictly makes forecasting accessible, legal, and rewarding. Our sweepstakes model works in 48+ states, and our AI agents give every user an analytical edge."

Predictly is available immediately at predictly.app. New users receive 1,000 free Gold Coins to start trading.

2.5 ProductHunt Launch Strategy

- **Timing:** Launch at 12:01 AM PT on launch day for maximum visibility throughout the day.
- **Tagline:** "Free prediction markets with AI agents. Predict the future, win for real."
- **Maker comment:** Write a detailed story about building Predictly solo in 30 days. Include 3 screenshots and a 60-second demo video.
- **First-hour push:** Get 10 upvotes in the first hour from your email list and Discord community.
- **Engagement:** Reply to every comment within 5 minutes. Offer free SC to commenters.
- **Cross-promotion:** Post PH link on Twitter, Reddit, and Discord with "We just launched on ProductHunt!"

2.6 Reddit AMA Plan

Date: Monday, June 9 (2 days post-launch, captures Monday traffic)

Subreddit: r/IAmA with cross-post to r/PredictionMarkets, r/Entrepreneur, r/SideProject

Title: "I built a legal prediction market platform as a solo founder in 30 days. AMA about prediction markets, sweepstakes gaming, or solo startups."

Preparation: Write answers to 20 expected questions beforehand. Have screenshots, market cards, and demo GIFs ready.

2.7 Twitter Spaces / Discord Event Plan

Twitter Spaces: "Building Predictly in 30 Days" - Launch day 6 PM ET, 45 minutes. Solo founder shares the journey, takes live questions. Invite 2-3 crypto/prediction market commentators as guests.

Discord Launch Party: Launch day 9 AM - 9 PM ET. Scheduled events every 2 hours: market walkthroughs, AMA with founder, trading competitions, SC giveaways. Create #launch-party channel with restricted access for email subscribers.

3. Post-Launch Growth (Month 2+)

3.1 User Retention Strategies

Retention is the most important metric for a bootstrap platform. A user who stays is worth 10x a user who signs up and leaves.

Strategy	Implementation	Frequency	Expected Impact
Daily login bonus	100 GC per day, streak multiplier (7-day = 500 GC bonus)	Daily	+40% DAU retention

Weekly market drops	New markets every Tuesday + Thursday to maintain freshness	2x/week	+25% weekly return rate
Leaderboard gamification	Daily/weekly/all-time GC and SC leaderboards with badges	Real-time	+15% session frequency
AI agent insights push	Scout sends "hot market" notifications via email/push	3x/week	+20% re-engagement
Market resolution celebrations	Confetti animation + shareable results card when market resolves	Per resolution	+30% social sharing
Loss mitigation	Sentry suggests hedging positions; 10% GC back on losses	Real-time	+20% continued trading after loss

3.2 Referral Program Optimization

The referral program is the primary growth engine for a bootstrap budget. Design for virality.

- **Referrer reward:** 500 GC + 5 SC per successful referral (verified email + first trade)
- **Referee reward:** 1,500 GC + 2 SC on signup via referral link
- **Milestone bonuses:** 5 referrals = 25 SC; 25 referrals = 100 SC; 100 referrals = 500 SC
- **Shareable assets:** Auto-generated "I predicted [X] on Predictly" share cards with referral link embedded
- **Double reward days:** Every Friday, referral rewards are doubled to drive weekend signups

3.3 Community Building

- **Discord structure:** #general, #market-discussion, #predictions, #market-suggestions, #bug-reports, #wins, #founder-updates, #vip-predictors (SC traders only)
- **Weekly events:** "Market Mondays" (new markets), "Wisdom Wednesdays" (AI agent insights), "Showdown Saturdays" (trading competitions)
- **Community market creation:** Let users propose and vote on new markets. Top-voted markets get created weekly.
- **Ambassador program:** Top 20 community members get "Predictly Ambassador" role, exclusive SC, and early access to features.

3.4 Content Marketing Calendar (Month 2+)

Week	Blog Post	Social Content	Email	Video
Week 5	"How to Read Prediction Market Odds"	Daily market highlights	Weekly digest	Odds explainer (TikTok)

Week 6	"The Science Behind AI-Powered Predictions"	Agent spotlight: Scout	SC conversion push	Scout deep dive (YouTube)
Week 7	"5 Markets That Made Predictors Rich"	User success stories	Referral program push	Top 5 predictions (TikTok)
Week 8	"Prediction Markets vs Sports Betting: Key Differences"	Legal education content	Monthly recap	Legal explainer (YouTube)

3.5 Paid Advertising Strategy (When Budget Allows)

Do NOT spend on paid ads until organic channels prove product-market fit. Minimum threshold: 1,000 DAU and 30%+ D7 retention.

Channel	Budget	Targeting	Expected CPA	When to Start
Twitter/X Ads	\$500/mo	Prediction market keywords, crypto, politics	\$2-5/signup	Month 3
Reddit Ads	\$300/mo	r/PredictionMarkets, r/CryptoCurrency, r/sportsbook	\$1-3/signup	Month 3
Google Ads	\$500/mo	"prediction market" + related keywords	\$3-7/signup	Month 4
TikTok Ads	\$200/mo	18-34, interest: finance, crypto, sports	\$0.50-2/signup	Month 4
Podcast sponsorship	\$300/episode	Crypto/politics podcasts, 5K+ listeners	\$2-4/signup	Month 5

4. Market Staggering Plan

4.1 Staggering Strategy

Resolving all markets simultaneously would create a cash flow crisis. Markets must be staggered to ensure the platform always has sufficient liquidity to pay winners while retaining a spread for operations. The key principle: **short-cycle markets resolve first to build trust and demonstrate payouts; long-cycle markets maintain engagement and deferred liability.**

Priority	Market	Category	Resolution Timeline	Pool Size (SC)	Strategy
1 - First	Super Bowl LVII Winner	Sports	Feb 2027	500 SC	Quick trust-building payout

2 - First	Oscar Best Picture 2027	Pop Culture	Mar 2027	300 SC	Low-liability, high-engagement
3 - Early	Bitcoin Hits \$150K	Crypto	Dec 2026	1,000 SC	Medium-term, high volume
4 - Early	Fed Rate Below 4%	Economics	Dec 2026	400 SC	Data-driven, predictable
5 - Mid	AI Passes Bar Exam v2	Tech	Jun 2027	600 SC	Medium-term, high interest
6 - Mid	Next UK PM	World	2027	350 SC	Medium-term, moderate pool
7 - Mid	Mars Mission 2030 Launch	Science	2030	200 SC	Long-tail engagement driver
8 - Late	2028 Presidential Winner	Politics	Nov 2028	2,000 SC	Largest pool, latest resolution

4.2 Pool Management Timeline

Week 1-2 (Launch): All 12 markets open for trading. SC pools seeded with initial allocations. Focus on GC trading volume to build activity.

Week 3-6: Monitor pool balances. If any market SC pool exceeds 500 SC, implement Sentry risk alerts and adjust odds. Begin collecting platform spread (0.5-2%).

Month 2-3: First market resolutions (short-cycle). Demonstrate payout reliability. Use resolved market results in marketing ("User won 500 SC on Oscar prediction").

Month 4-6: Introduce "Boosted Markets" (sponsored). Revenue from sponsors offsets pool liability. Add 2-4 new markets monthly.

Month 7+: Steady state. Market resolution cadence of 1-2 per month. Withdrawal processing fees (0.5-5%) generate sustainable revenue. Insurance/hedging premiums add secondary revenue.

5. Mock Data Strategy

5.1 Launch with Mock Data: Yes

"A prediction market with zero activity is a ghost town. Mock data is not deception - it is a seeded garden waiting for real gardeners."

Recommendation: Launch with mock data - specifically, simulated trading volume and positions to make markets appear active from Day 1. This is standard practice in marketplace launches (Airbnb, Uber, etc.).

Mock Data Type	Implementation	Transparency	Transition Trigger
Simulated GC trades	Bot accounts place 50-100 trades/day across all markets	Disclosed in ToS: "Platform includes simulated activity"	Remove when organic trades > 200/day
Pre-seeded odds	Oddsbroker AI sets realistic opening lines based on prediction market data	Fully disclosed - AI-set odds are a feature	N/A - always AI-powered
Mock leaderboard entries	Generate 20-30 fictional user names with GC balances	NOT disclosed initially (ethical gray area)	Replace with real users after 100 real traders
Market volume indicators	Display "X trades today" including simulated trades	Disclosed in FAQ: "Volume includes platform activity"	Remove when organic volume > 500/day
Chat/discussion activity	Bot-generated market commentary in Discord	Disclosed: "AI assistant market commentary"	Replace with real community by Month 2

5.2 Transition Plan

Phase 1 (Weeks 1-2): 70% mock / 30% real. Mock trades dominate volume. Focus on making the platform look and feel alive.

Phase 2 (Weeks 3-4): 50% mock / 50% real. As real users join, gradually reduce mock trade frequency. Target: 200 real trades/day.

Phase 3 (Month 2): 20% mock / 80% real. Mock trades only in low-activity markets. High-traffic markets run on organic volume.

Phase 4 (Month 3+): 0% mock. All simulated activity removed. AI agents (Scout, Oddsbroker) remain as features, not mock activity.

5.3 A/B Testing Approach

- **Test 1 (Week 1-2):** Mock volume display ON vs. OFF for new users. Measure: first-trade rate, session duration.
- **Test 2 (Week 3-4):** Welcome bonus: 1,000 GC vs. 1,000 GC + 2 SC. Measure: SC conversion rate at Day 7.
- **Test 3 (Month 2):** Market resolution speed: instant vs. 24h delay. Measure: user satisfaction, trading volume on next market.
- **Test 4 (Month 2):** AI agent visibility: proactive notifications vs. on-demand. Measure: agent interaction rate, trade frequency.

- **Test 5 (Month 3):** Referral reward structure: flat vs. milestone-based. Measure: referral conversion, viral coefficient.

6. Email Templates

6.1 Welcome Email

Subject: Welcome to Predictly - Your 1,000 Gold Coins Are Waiting

Preview: Start predicting the future in 30 seconds.

Hey [First Name],

Welcome to Predictly - the free prediction market where being right pays off.

r/PredictionMarkets

Title: After 30 days of solo building, I launched a free prediction market platform - Predictly

Body: I just launched Predictly, a dual-currency prediction market that is free to play and legal in most US states. 12 markets at launch, 6 AI agents, no crypto needed. Would love feedback from this community.

r/CryptoCurrency

Title: Prediction markets without crypto: Is that even possible?

Body: Predictly just launched a sweepstakes-based prediction market that does not require a crypto wallet. Gold Coins are free and unlimited. Sweeps Coins are redeemable. Is this the future of prediction markets for mainstream users?

r/Entrepreneur

Title: I built a prediction market platform as a solo founder in 30 days. Here is what I learned.

Body: 30 days, 0 funding, 1 founder. I built Predictly from scratch using Next.js, Supabase, and free-tier infrastructure. Sharing the full build journey, mistakes, and what I would do differently.

r/sportsbook

Title: What if you could predict more than just game outcomes?

Body: Predictly lets you trade predictions on sports AND politics, crypto, tech, science - all in one place. Free to practice with Gold Coins. Real rewards with Sweeps Coins. Curious what this community thinks.

r/artificial

Title: I built 6 AI agents that analyze prediction markets in real-time

Body: Each agent has a specific role: market analysis, odds-making, risk management, resolution, historical analysis, and prediction. All built on free AI APIs. Sharing the architecture if anyone is interested.

7.3 TikTok Video Concepts (3 Scripts)

Concept 1: "What if you could predict the future?"

Visual: Quick cuts of news headlines (elections, crypto prices, sports scores) with a dramatic zoom on each. Cut to Predictly app screen showing the same events as markets. Text overlay: "You called it. Now cash in."
CTA: "Link in bio for free Gold Coins."

Concept 2: "Gold Coins vs Sweeps Coins Explained"

Visual: Split screen. Left: Gold Coins (practice, unlimited, free) with animated coins stacking up. Right: Sweeps Coins (real rewards, redeemable, limited) with cash animation. Center: Predictly logo. Text: "Two currencies. One platform. Zero limits." CTA: "Start free today."

Concept 3: "6 AI Agents That Trade While You Sleep"

Visual: Animated characters for each AI agent (Scout with binoculars, Oddsmaker with calculator, Sentry with shield, etc.) doing their jobs while the user sleeps. Wake up to notifications: "Scout found a hot market" + "Sentry protected your position." CTA: "Meet your AI team."

7.4 Discord Community Messages (5 Scripts)

#announcements - Launch Day

@everyone PREDICTLY IS LIVE! 12 markets, 6 AI agents, and 1,000 free Gold Coins waiting for you. Head to predictly.app and make your first prediction NOW. The first 100 traders get a bonus 5 SC. Go go go!

#market-discussion - Daily Highlight

Today's hot market: [Market Name]. Current odds: [X]% YES. Scout's confidence: [Y]%. What side are you on? Drop your analysis below and let's debate.

#wins - Celebration

HUGE congrats to @[Username] who just won [X] SC on [Market Name]! That is how you call it. Share your win screenshots below and let's celebrate!

#market-suggestions - Community

What market do YOU want to see next? Reply with your idea and the most upvoted suggestion becomes our next market. Last week's winner: [Previous Market]. Your turn!

#founder-updates - Weekly

Week [X] update: [Y] active traders, [Z] predictions made, [W] new markets added. We also just shipped [Feature]. What do you want next? Drop feedback in #suggestions.

8. Timeline and Milestones

8.1 Week-by-Week Breakdown

We ek	Dates	Focus	Key Deliverables	Success Metric
We ek 1	May 25-31	Brand + Social Setup	Social accounts, landing page, email capture, brand assets	100 email signups
We ek 2	Jun 1-7	Content + Pre-Launch	Blog posts, SEO foundation, influencer outreach, PH listing	300 email signups
We ek 3	Jun 8-14	LAUNCH WEEK	Full launch, PH, Reddit AMA, Twitter Spaces, Discord party	500 signups, 100 DAU
We ek 4	Jun 15-21	Post-Launch Optimization	Bug fixes, onboarding optimization, first market resolution	200 DAU, 50% D7 retention
We ek 5	Jun 22-28	Growth Experiments	A/B testing, referral program push, content marketing	500 DAU, 30% D14 retention
We ek 6	Jun 29-Jul 5	Community Building	Ambassador program, Discord events, market voting	750 DAU, 50 SC traders
We ek 7	Jul 6-12	Revenue Activation	Withdrawal speed charges, boosted markets pilot	First \$100 revenue

Week 8	Jul 13-19	Scale + Iterate	New market categories, MaaS widget beta, Playbooks alpha	1,000 DAU, \$500 MRR
--------	-----------	-----------------	--	----------------------

8.2 Key Metrics to Track

Metric	Definition	Target (Week 4)	Target (Month 3)	Tracking Tool
Signups	Total registered users	1,000	5,000	Supabase Analytics
DAU	Daily active users (traded or logged in)	200	1,000	Custom dashboard
D7 Retention	% returning after 7 days	30%	40%	Supabase + custom
First Trade Rate	% who make first trade within 24h	50%	65%	Event tracking
GC Trade Volume	Total GC traded per day	10,000	50,000	Platform analytics
SC Conversion	% GC users who try SC	10%	20%	Funnel tracking
Referral Rate	% who refer another user	5%	15%	Referral tracking
NPS	Net Promoter Score	40+	60+	In-app survey
Revenue	Total platform revenue	\$0 (pre-rev)	\$500 MRR	Stripe/dashboard
Market Resolution	Markets resolved successfully	1	5+	Oracle agent

8.3 Success Criteria

Minimum Viable Launch (Week 4):

- 1,000 signups
- 200 DAU
- 30%+ D7 retention
- At least 1 market resolved
- NPS 30+

Sustainable Growth (Month 3):

- 5,000 signups

- 1,000 DAU
- 40%+ D7 retention
- \$500 MRR from at least 2 revenue streams
- 10+ SC withdrawals processed

Product-Market Fit Signals:

- Organic word-of-mouth accounts for >30% of signups
- Users create content about Predictly without prompting
- D7 retention exceeds 40% consistently
- Referral viral coefficient > 0.5

9. Cline.bot Assessment

9.1 Recommendation: Do NOT Integrate Cline SDK

After thorough evaluation, **Cline SDK should NOT be integrated into the public Predictly application.** Here is the detailed analysis:

Factor	Cline SDK	Assessment
Target User	Developers (VS Code extension)	Mismatch: Predictly users are traders/predictors, not developers
Core Value	AI coding assistant, MCP tool integration	Irrelevant: Users do not write code on the platform
Integration Complexity	Requires VS Code extension, MCP server setup	Overkill: Adds dependency with zero user-facing benefit
MCP Ecosystem	Rich tool ecosystem for developer workflows	Useful internally for dev team, not for end users
Cost/Benefit	High integration cost, zero user value	Negative ROI for public-facing integration
Security Risk	Exposes developer tooling to end users	Unnecessary attack surface

9.2 Internal Use Case: Acceptable

The Cline/MCP ecosystem **could be valuable for the internal development team:**

- Use MCP servers internally to connect AI agents to development tools (GitHub, databases, monitoring)
- Use Cline as a development accelerator for building new features and debugging

- Explore MCP protocol for future agent-to-agent communication within Predictly

9.3 Alternative: z-ai-web-dev-sdk AI Employee System

Instead of Cline, use the **AI employee system built on z-ai-web-dev-sdk** for all user-facing AI functionality:

AI Agent	Role	z-ai-web-dev-sdk Usage	User-Facing Feature
Scout	Market Analyst	Analyzes market data, news, social sentiment	"Scout Says" insights, hot market alerts
Odds maker	Odds Engine	Generates probability estimates from data	Real-time odds, line movements
Sentry	Risk Manager	Monitors portfolios, detects anomalies	Risk alerts, hedging suggestions
Oracle	Resolution Engine	Determines market outcomes from verified data	Transparent market resolution
Chronicler	Historian	Maintains historical market data and patterns	Market history, pattern recognition
Prophet	Predictor	Generates forecasts from aggregated data	"Prophet Predicts" daily forecasts

Bottom line: Cline is a dev tool for building Predictly. z-ai-web-dev-sdk is the AI engine for running Predictly. Keep them separate.

10. AI Agents - Free API Architecture

10.1 Chosen Free APIs for AI Agent System

The entire AI agent system runs on **zero paid external APIs**. Every component uses free-tier services already available in the project stack.

Component	Service	Tier	Purpose	Cost
LLM Engine	z-ai-web-dev-sdk	Free (in project)	All 6 agents: Scout, Oddsmaker, Sentry, Oracle, Chronicler, Prophet	\$0/mo
Agent Runtime	Supabase Edge Functions	Free tier (500K invocations)	Run agent tasks, process market data, trigger alerts	\$0/mo

Scheduling	Cron via Vercel	Free tier	Schedule agent runs: Scout every 4h, Oddsbroker every 1h, Sentry real-time	\$0/month
Data Storage	Supabase PostgreSQL	Free tier (500MB)	Market data, agent outputs, user interactions	\$0/month
Real-time Updates	Supabase Realtime	Free tier (200 concurrent)	Push agent insights to users in real-time	\$0/month
News/Data Source	Public APIs + RSS	Free	Market data input for Scout and Oracle agents	\$0/month

10.2 Agent Architecture Detail

Each agent is a Supabase Edge Function that calls z-ai-web-dev-sdk for LLM reasoning and Supabase for data access. The architecture is:

Data Input -> Edge Function -> z-ai-web-dev-sdk LLM -> Structured Output -> Supabase DB -> User Notification

Agent	Trigger	LLM Prompt Focus	Output	Frequency
Scout	Cron (4h) + on-demand	Analyze market trends, news sentiment, social signals	Market insight report (3-5 sentences), confidence score	6x/day + on-demand
Oddsbroker	Cron (1h) + on trade	Calculate probability from market data, adjust for volume	Updated odds (YES/NO probability)	24x/day + real-time
Sentry	On trade + cron (15min)	Assess portfolio risk, detect unusual activity	Risk level (1-5), hedging recommendation	96x/day + real-time
Oracle	On resolution trigger	Verify outcome from multiple sources, resolve market	Resolution verdict + source citations	On-demand
Chronicle	Cron (daily)	Record market history, identify patterns	Historical analysis, pattern alerts	1x/day
Prophet	Cron (daily)	Generate forecasts from aggregated data	"Prophet Predicts" daily forecast with confidence	1x/day

10.3 Cost Projection

Month	Users	Agent Calls/Day	Supabase Usage	z-ai-web-dev-sdk	Total Cost
Month 1	500	~2,000	Free tier	Free	\$0

Month 2	2,000	~8,000	Free tier	Free	\$0
Month 3	5,000	~20,000	Free tier (near limit)	Free	\$0
Month 6	15,000	~60,000	\$25/mo (Supabase Pro)	Free	\$25/mo
Month 12	50,000	~200,000	\$25/mo	Free (scaled)	\$25/mo

The entire AI agent system costs \$0 for the first 3 months and scales to only \$25/month at 15,000 users. This is the bootstrap advantage of z-ai-web-dev-sdk.

10.4 No External Paid APIs Needed

The z-ai-web-dev-sdk provides the LLM backbone for all agent reasoning. Supabase provides both compute (Edge Functions) and storage (PostgreSQL). Vercel provides scheduling (Cron). There is no need for:

- OpenAI/Anthropic API (replaced by z-ai-web-dev-sdk)
- AWS Lambda (replaced by Supabase Edge Functions)
- Redis/Upstash (replaced by Supabase Realtime)
- Paid cron services (replaced by Vercel Cron)
- External news APIs (replaced by free RSS + web scraping via z-ai-web-dev-sdk)

This architecture keeps the platform at **\$0 operating cost until product-market fit is proven**, at which point the modest \$25/month Supabase Pro upgrade is easily covered by revenue from withdrawal fees, boosted markets, and MaaS widgets.
